

## Log frame template

The log frame should be used by the Project Coordinator, the Lead Researcher, other project participants and the ICARS Advisor to plan, monitor the progress of the research project and to identify challenges and ways to overcome those. The log frame is a dynamic tool that should be used, regularly updated and shared with ICARS as part of the ongoing management of the research project. The sections highlighted in orange color should be used to assess the progress of each output.

Please add rows as needed.

Level	Description	Indicator	Baseline	Target			Responsible institution/person	Challenges	Ways to overcome	Is the achievement of the output on track?*
				Year 1	Year 2	Year 3				
Outcomes										
Output 1										
	<b>Description</b>	<b>When</b>								
Activity 1		[Indicate time]								
Activity 2		[Indicate time]								
Activity X		[Indicate time]								
Output 2										
	<b>Description</b>	<b>When</b>								
Activity 1		[Indicate time]								
Activity 2		[Indicate time]								
Activity X		[Indicate time]								
Output X										
	<b>Description</b>	<b>When</b>								
Activity 1		[Indicate time]								
Activity 2		[Indicate time]								
Activity X		[Indicate time]								

\*Please indicate whether the achievement of each output is on track using traffic light colors, green = fully on track, yellow = somewhat challenged, red = very challenged
